

This listing of claims will replace all prior versions,
and listings, of claims in the application:

LISTING OF CLAIMS:

24 Claim 1 (currently amended): A screw-on structure
comprising:

a plastic frame having a through hole;

a frame ~~where~~ having a screw hole ~~is formed~~;

a screw ~~that is inserted into said through hole to be
screwed down said screw hole and that fastens~~ fastening said
plastic frame and said frame to each other; and

ribs made of plastic ~~provided on~~ integral with said
plastic frame and extending from an inner surface of said through
hole ~~and pretrude~~ toward the center of said through hole to
contact a shaft section of said screw, such that a circle
defining a maximum diameter of said through hole passes through
said ribs.

Claim 2 (original) The screw-on structure according to
claim 1, wherein three or more of said ribs are provided.

Claim 3 (original) The screw-on structure according to
claim 1, wherein a shape of the far end of said rib is a shape
along a virtual cylinder surface whose diameter substantially

PM
equals the outer diameter of the shaft section of said screw and whose center axis substantially matches the center axis of the shaft section of said screw.

Claim 4 (original) The screw-on structure according to claim 2, wherein the shape of said ribs in a cross-section perpendicular to the center axis of said screw forms an arc, and the far end of each of said ribs contacts a virtual circle whose diameter substantially equals the outer diameter of the shaft section of said screw and whose center axis substantially matches the center axis of the shaft section of said screw.

/ / /
Claim 5 (canceled).

Claim 6 (currently amended): A ~~The~~ screw-on structure ~~according to claim 1,~~ comprising:

a plastic frame having a through hole;

a frame where a screw hole is formed;

a screw that is inserted into said through hole to be screwed down said screw hole and that fastens said plastic frame and said frame to each other; and

ribs made of plastic provided on an inner surface of said through hole and protrude toward the center of said through hole to contact a shaft section of said screw,

DK
wherein said plastic frame and said frame form a frame
of a cellular phone by screwing on with each other.

Claim 7 (original) The screw-on structure according
to claim 6, wherein said plastic frame is a part that composes
a non-display side of said cellular phone, and said frame is a
part that composes a display side of said cellular phone.

Claim 8 (new): The screw-on structure according to
claim 2, wherein said ribs number three and a section of said
inner surface of said through hole having a maximum diameter
directly faces said ribs.
